NOTE-TAKING APP

Created by

Team

Table of Content

INTRODUCTION
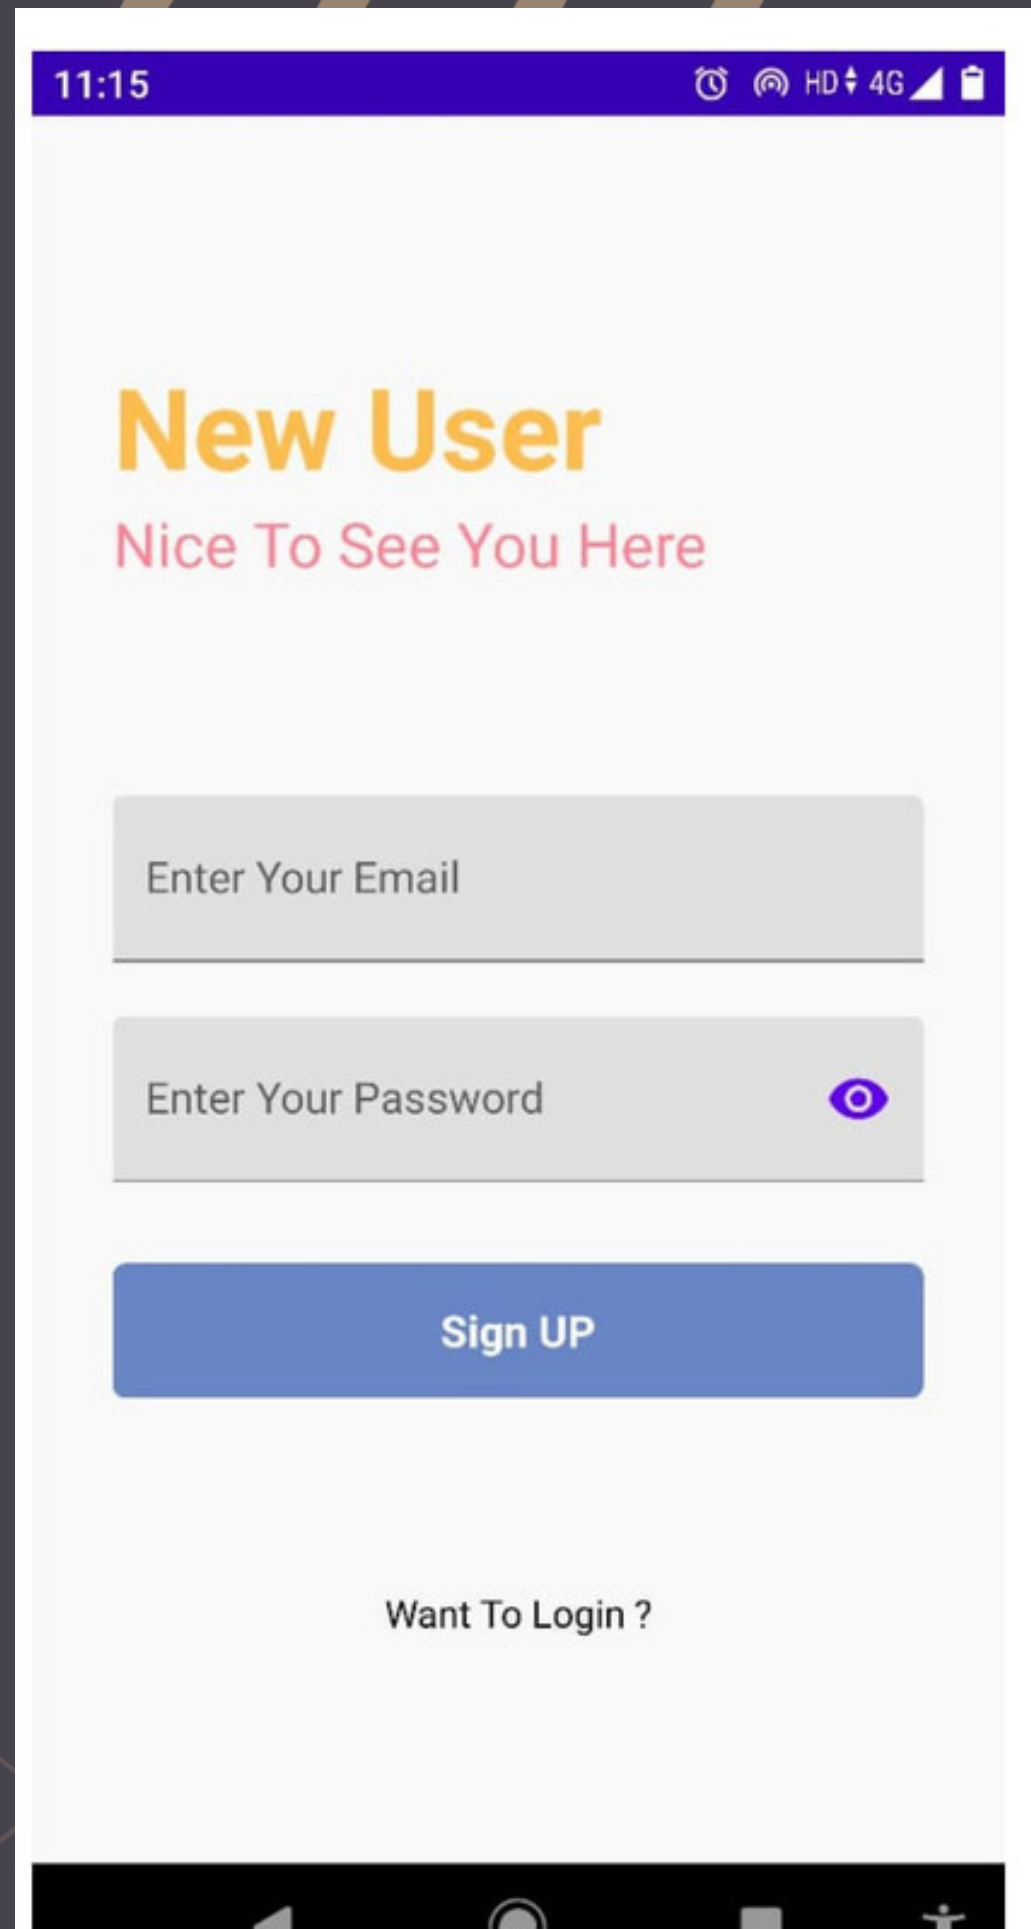

Note taking app is an user-friendly app. it allows users to create a note, modify it and delete. the app is very useful for the people who are handling many activities in their workplace and daily life.

It also helps for the students to organize their study routine.

Features

- Note creation
- Note organization
- Sharing the notes
- Authentication of the user
- Customizing the note
- Exporting the note

Designing

We have used figma website to create the clickable wireframes. On the basis of feedback from others we have made changes to visual design.
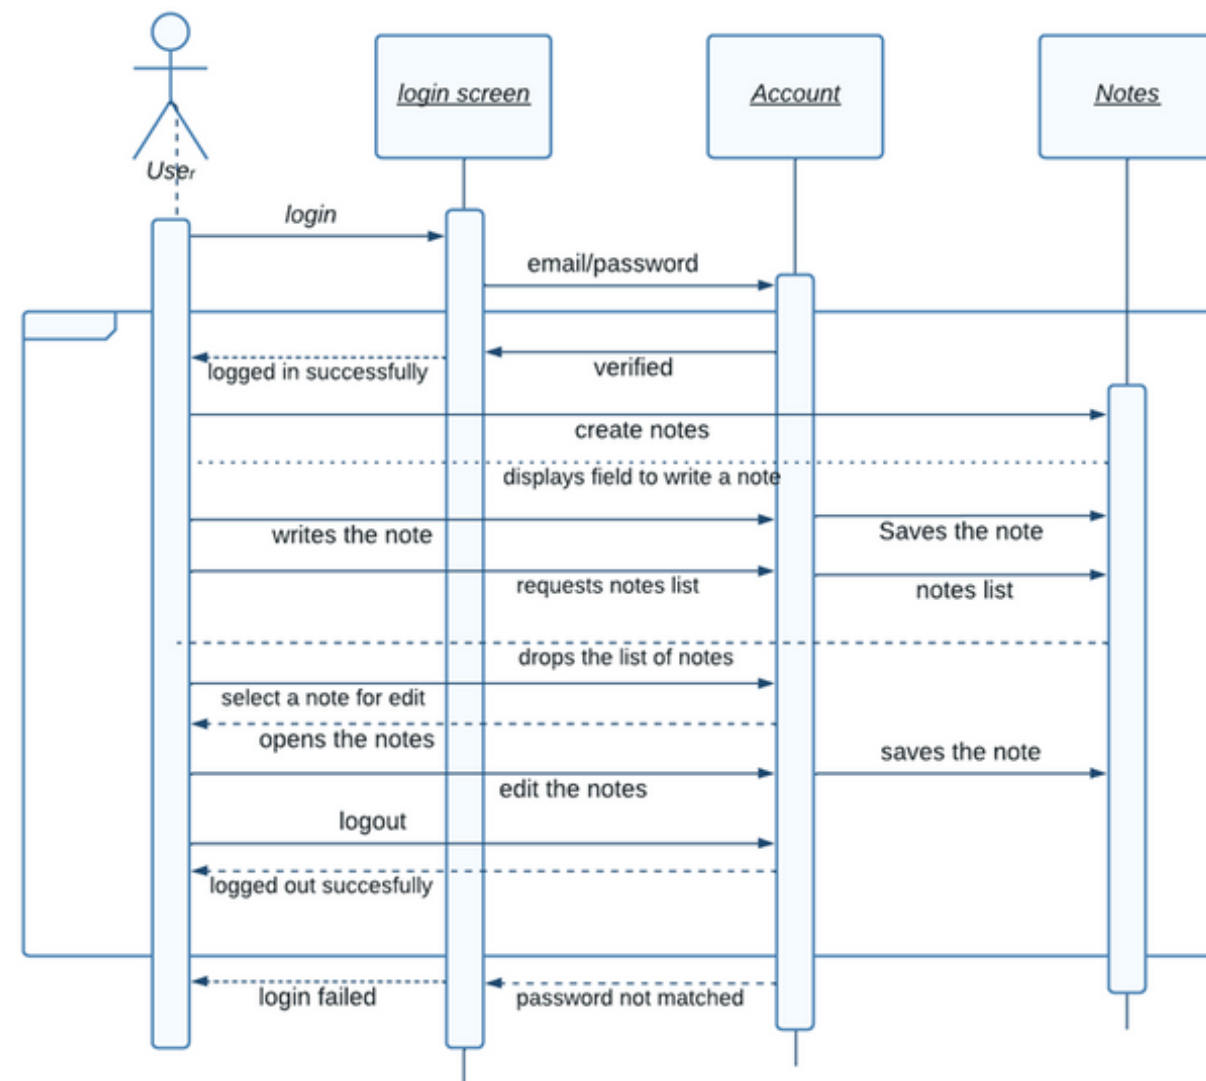

The designing phase consist of making the sequence diagram and class diagram.

These models helped in creating the clickable wireframes.

Home Activity

+Archive()
+Notes list()
+Create Notes()
+Profile()
+Settings()

Note

+Edit Notes()
+Add notes()
+Delete Notes()
+Save Notes()
+view Note()
+Modify Note()
+Note Title()
+Note body()

Create Tag

+choose color()
+lable()

**setting Activity**

+Change account()
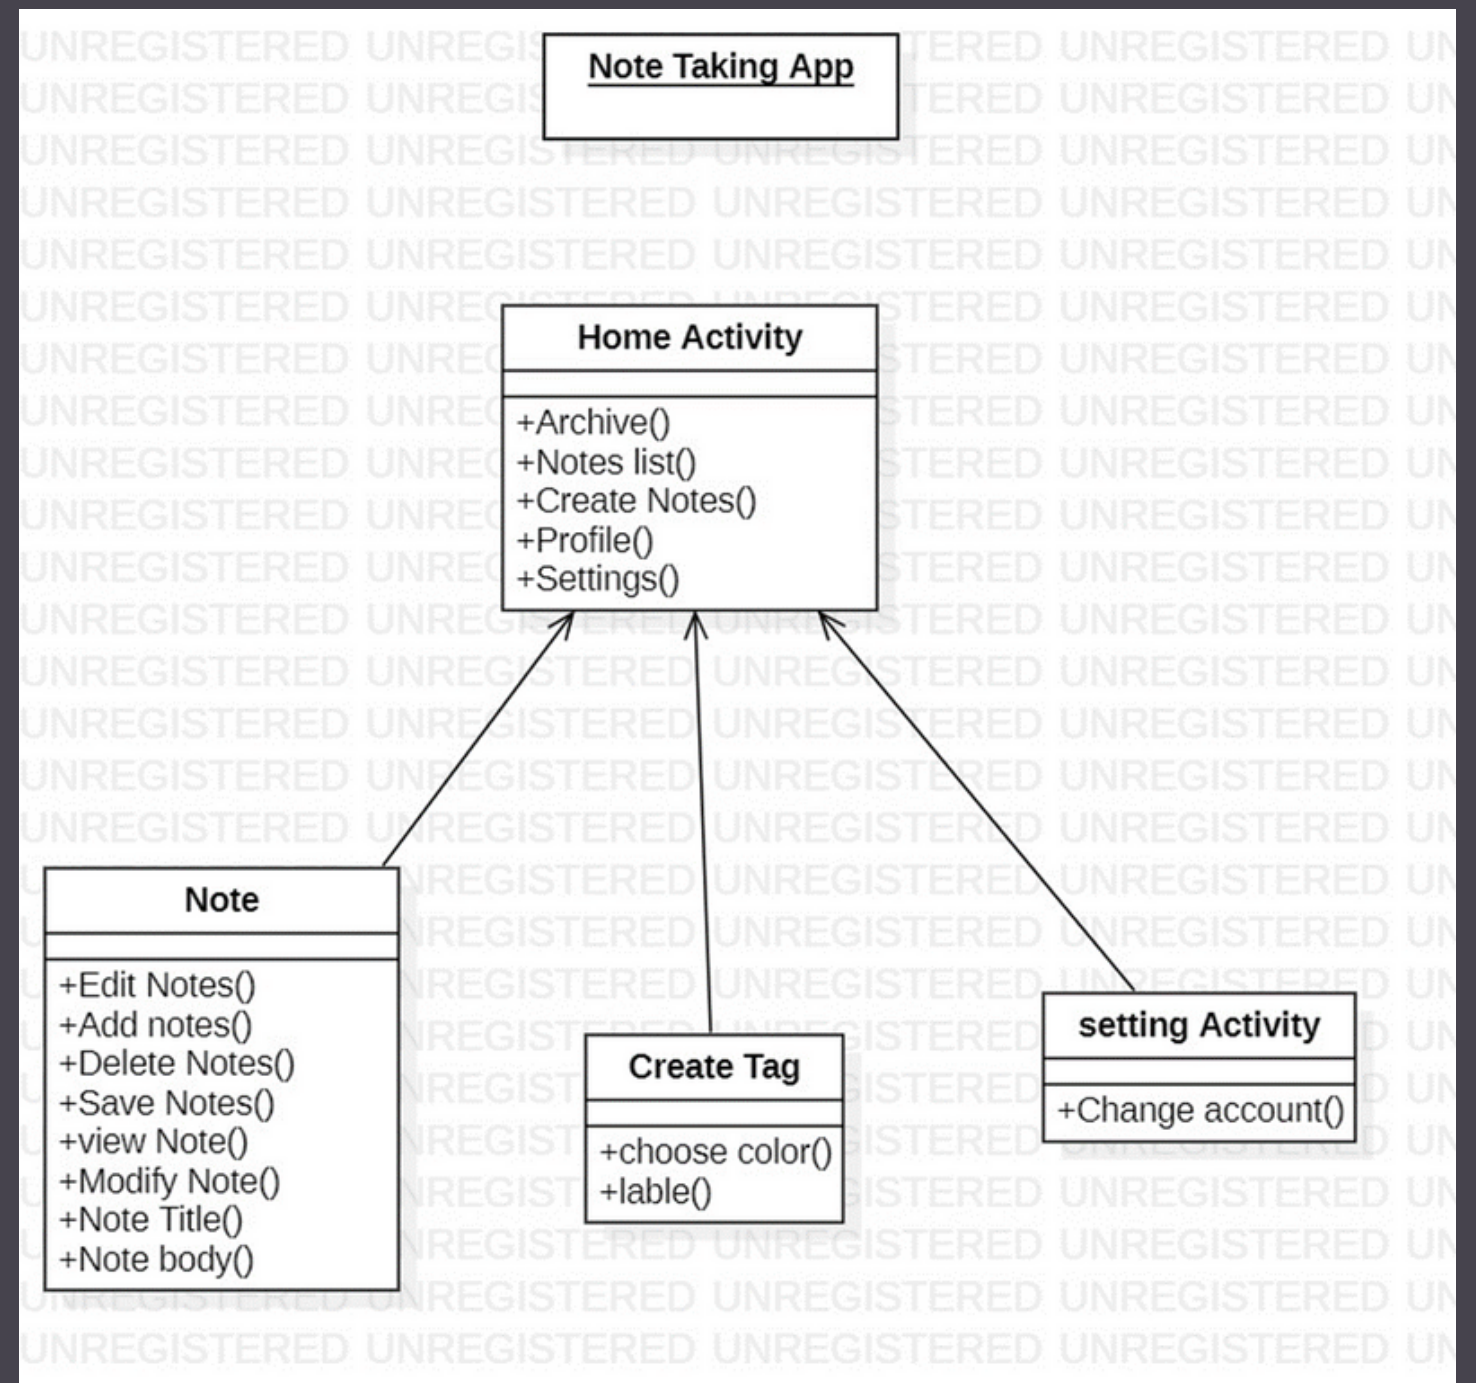

CHALLENGES

- User interface design
- Data Storage and Management
- Compatibility with various platforms
- User Privacy

These are some of the challenges we taken care of.

Experiences

Developing a note-taking app was a challenging but rewarding experience. Throughout the development process, we faced several challenges like ensuring data security and privacy and also we taken care of managing user feedback and expectations.

We learnt how to use different programming languages to be implemented in a single project. And working with the team members was a great experience.
